

HIGH-TECH INNOVATIONS

SIMPLE. SAFE. LIVING.

2023 – 2025

SIMPLE.
SAFE.
LIVING.

OUR PHILOSOPHY. SINCE 1990.

Safety is everyone's concern. **Simple. Safe. Living.**
This is what PFANNER® has stood for since 1990.

Every head deserves protection. **The original.**
PROTOS® has been producing the world's safest head
protection since 2012.

PFANNER® safety solutions protect people who
approach their limits at work every day. They protect
people who work outdoors or engage in outdoor
activities and are thus exposed to the whims of nature.
Our protective clothing is reduced to the essential: it's
functional thanks to high-tech materials, comfortable
to wear and has a contemporary design. Safety and
comfort are our top priorities.

Discover new products, improved products and
classics from our diverse range. Let the many
features you will find throughout the 212 pages of
our catalogue surprise you.

Get inspired, from head to toe.

Anton Pfanner

Founder, CEO, Visionary

SUSTAINABILITY

Sustainability is a priority for us. And especially because we go hand in hand with the forestry industry, our most important principle of action is to deal responsibly with valuable resources.

Based in one of the most beautiful regions of Central Europe, we have the treasures of nature before our eyes every day. In order to preserve them for our children, we see it less as a duty and rather as a natural desire, to minimize the environmental footprint in the manufacturing of our products.

Made in Europe

To manufacture our products we use high-quality fabrics and accessories from Europe. Regionality is important to us and therefore the majority of employed materials originates in Austria and neighbouring Switzerland. Short transport routes in our European production facilities save time, money and protect the environment.

Investments

In recent years we have invested a lot. Among other things, in the development of our power supply, since our warehouses now use solar energy instead of oil burners. We are also environmentally conscious during the transport and within the Vorarlberg region we rely on low-emission electric vehicles.

What you have in your hands

This catalogue and all other print advertising materials are printed on recycled or PEFC certified paper and the process is climate-neutral. Even our packaging, consisting of a mix of recycled and FSC paper, is recyclable.

BRANDS AND TECHNOLOGIES DEVELOPED BY PFANNER®

Customised and innovative solutions require expertise and the knowledge of current technologies and options. Through our proprietary and patented technologies, we have the right solution for every application and stand out due to our individuality.

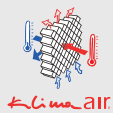

Gladiator®

The extremely tear-resistant outer fabric meets the highest demands and is water-repellent, oil and dirt resistant. Besides, it is extremely abrasion-resistant and resistant to thorns.

StretchFlex®

The proven StretchFlex® technology ensures a perfect fit and enhanced breathability, thus providing maximum comfort.

KlimaAIR®

Patented rear ventilation system for cooling in summer and thermal insulation in winter. This fabric is used in different thicknesses for shoes as well as jackets and pants.

Nanoshield®

Water and stain repellent coating. Extremely easy to clean and resistant to natural acids.

StretchAIR®

Breathable stretch fabrics keep you comfortable during physical exertion. Used with various additional equipment from jackets to functional shirts or pants.

3CON®

The 3CON® reflective strips and icons ensure maximum light reflection properties on all fabrics. These provide additional security through increased visibility.

StretchZone®

Elastic fabric inserts provide more freedom of movement and comfortable wear for jackets and pants. Work wear with added value.

100% MembranFREE

Doing without any membranes enables maximum breathability, thus reducing considerably the moisture formation.

Zipp4Fit.

Zipp4Fit®

Patented Zipp4Fit® zip closure system for flexible adaptation to the wearer.

Zipp2Zipp® pocket system

Enables sensationally convenient access to the sorting compartments.

AEQUALITAS – Gleichberechtigung®

Absolute equality for right and left-handers. Sophisticated sorting compartments hold all utensils in place.

Holzer (Lumberjack)

Axe and Picaroon – the forestry equipment for a successful day's work in the forest. Both tools are united in our well thought-out Holzer emblem.

PROVEN SOLUTIONS ADOPTED BY PFANNER®

High-quality products can only be manufactured with reliable and quality-conscious partners. That is why, besides our own technological developments, we rely on partners who also demand the utmost from their products. Our partnerships have been together for many years, inspiring each other to become better and better.

Vibram

Abrasion-, water- and winter-resistant rubber soles with exceptional grip for safety shoes and work shoes as well as for mountain and outdoor use. Durable and cushioning with each step.
vibram.com

PU TEK®

High protection and extreme lightness characterize this new, extremely durable material. Breathable, flexible and water-repellent.

BOA®

BOA® Fit System: Patented quick-release system for the precise fit of your shoes. Quick and effortless to use.
boafit.com

Sanitized Actifresh

The Sanitized Actifresh finish ensures effective hand protection against bacterial growth and provides all-day protection and freshness. Kind to the skin and dermatologically tested.
sanitized.com

Sympatex

The Sympatex membrane reliably keeps the body dry and regulates body temperature. Waterproof, breathable, windproof and durable.
sympatex.com

PrimaLoft®

Keeps you warm and pleasantly dry. PrimaLoft® Gold impresses with its high insulating properties as well as its breathability. primaloft.com

Cordura

Its extreme robustness and abrasion resistance characterize the Cordura fabric. Durable, resistant, water- and dirt-repellent.
cordura.com

3M Scotchlite

Retroreflective properties for significantly increased visibility in all weather conditions and work situations. For your safety.
3maustria.at

GORE-TEX

Absolutely waterproof and breathable with the "Guaranteed to keep you dry" pledge. Best protection against water and snow meets highest wearing comfort. gore-tex.com

kwf

Risks to forest workers, consumers and the environment are identified and assessed objectively and independently to prevent and avoid accidents and damage.
kwf-online.de

WE ARE EXPERTS.

Simple.

User-friendly, tear-resistant and easy-care functional clothing is a top priority for us. Because that's what defines not only the quality of the materials but also their longevity. The clothing is thus tailored to your particular application. No unnecessary pockets, no unnecessary seams. Everything is exactly where it belongs. The handling is clear and self-explanatory. Our service is personal and uncomplicated. We are pleased to answer any questions or requests you may have.

Safe.

We are continuously pushing technical expertise and advancements. The use of the latest technical possibilities, combined with innovative ideas, help us to develop new inventions, implemented for your safety. Exceptional quality is not a luxury for us, but essential for your life. Enduring and detailed test phases are an obligation for us, if you entrust your life to our products. Optimal protection and maximum safety are thus always our priority.

Living.

Life and experience are paramount. Comfort, function and protection are indispensable in daily extreme situations. Quality you can trust – in all regions from north to south. We manufacture under humane and certified conditions in Europe and only use pollutant-free products. Our employees and suppliers also appreciate this.

Avertic®

In addition to the safety aspects per se, with the chainsaw protection fabric from Avertic® we pay special attention to comfort and durability. engtex.com

COOLMAX

Keeps you cool and dries quickly. Excellent moisture management and breathability. With anti-bacterial effect.

Modal

The lightweight natural wood-based fabric is breathable, soft, cuddly and yet robust and durable. The surface is very smooth and does not itch, so it scores with allergy sufferers. It also offers maximum comfort thanks to its good moisture management.

Tencel

Cellulose fibres of botanical source set a new standard for sustainability and natural comfort. Thermoregulation for a cool, dry feeling. tencel.com

37.5

Excellent moisture management – regulates the microclimate for maximum comfort and helps the body to maintain a comfort temperature of 37.5 degrees Celsius. thirtysevenfive.com

Original Alpen Loden

The high-quality merino sheep's wool is processed on state-of-the-art machines to obtain the finest Loden. This quality product meets the highest standards and offers optimal protection against cold and rain. pischl.at

UP FOR THE
ADVENTURE.

ESPECIALLY FOR KIDS.

We have expanded our children's assortment with numerous new items, ranging from the practical StretchAIR® Rain Jacket to the PROTOS® Inuit Teddy Vest and the StretchFlex® Cancool Pants.

Because we pay special attention to the safety of the little ones.

Gladiator® Tracking Jacket

- Zipp2Zipp® pocket system
- Quick access to weapons with the side zipper
- Extremely thorn- and tear-resistant outer fabric
- Sympatex membrane for waterproof chest and shoulder areas
- 50 cm long air vents in the underarm area
- Spacious game pocket
- High-closing collar
- Adjustable ventilation in the back area

Tracking often picks up speed quickly and a jacket has to endure everything. The Gladiator® Tracking Jacket has an extremely tear-resistant outer fabric with which thorns are not noticeable. The StretchAIR® and Klima AIR® technologies ensure breathability and maximum freedom of movement, which increases the wear comfort.

Material:

Upper 1: 83 % EME lycra, 17 % PES T-400
Stretch fabric: 92 % polyamide, 8 % elastane
Upper 2: 100 % polyamide Cordura
Lining: 100 % PES (Volume: 95 % air and 5 % PES)

Sizes: (Special products possible)

XS–XL, LS: XXL–4XL
Large sizes + 10 % to 15 % surcharge

The additional ventilation at the back prevents collapsing due to overheating. The high-closing collar prevents the penetration of pine needles and other debris into the jacket. The Zipp2Zipp® pocket system with the eye for signal band removal and reflective stripes ensure the visibility in the undergrowth.

Ventura Rain Jacket

- 20,000 mm water column
- Front zipper with wind flap
- Elastic outer fabric
- Velcro fastener at sleeves
- High-closing collar with chin protection
- Optional hood

Note:

Not suitable for fir needles. They pierce the membrane.

The Ventura Rain Jacket has a Sympatex membrane for reliable moisture protection with highest wear comfort. This membrane ensures water-tightness at maximum breathability. This way, the jacket is particularly suitable for physically demanding activities. The zipper in the armpits can be opened for an additional ventilation. The Velcro fastener on the sleeves can be adjusted individually and prevents the penetration of dirt and water. The new reflective stripes and 3CON® Reflex icons now provide the Ventura Rain Jacket with even better visibility and therefore additional safety.

Zipp2Zipp®

KlimaAIR® Forest Jacket

- StretchAIR® technology
- KlimaAIR® technology
- High-closing collar
- Extremely robust
- Waterproof shoulders
- Water- and dirt-repellent
- Zipp2Zipp® pocket system
- Spare sleeves available separately (Item 107031)

Proven for decades – the KlimaAIR® Forest Jacket is our all-time favourite. KlimaAIR® and Stretch-AIR® technologies ensure maximum wearing comfort – for the entire year. The removable sleeves and the additional ventilation at the back guarantee work without collapsing even on hot days. The water- and dirt-repellent outer fabric is extremely tear-resistant and ensures the longevity of the jacket.

Material:

Upper: 83 % EME lycra, 17 % PES T-400
Stretch fabric: 92 % polyamide, 8 % Elastane
Lining: 100 % PES

Sizes: (Special products possible)

XS–XL, LS: XXL–4XL
Large sizes + 10 % to 15 % surcharge

The patented Zipp2Zipp® pocket system on both sides provides storage and optimal access for a note pad or mobile phone. The high-closing collar prevents the penetration of the branches and dirt.

Loden Pants

- Noiseless and dirt-repellent merino Loden fabric
- Cocona lining
- Better fit through new, ergonomic cut
- High kidney protection
- Knife pocket
- Zipp2Zipp® pocket system
- Zip-able gaiters

The original PFANNER® Loden Pants made of traditional Tyrolean Loden fabric, with extra-high waistband and a practical Zipp2Zipp® pocket system, are absolutely noiseless. The Cocona lining with the natural fibres prevents skin irritation and provides maximum wear comfort, since it wicks moisture away from the body. The high content of merino wool ensures natural odour-inhibition and is self-cleaning in the event of soiling. Zip-able gaiters provide effective protection from ticks, dirt and snow.

Gladiator® Extreme. The name says it all. These pants are made for the toughest challenges. Guaranteed 100 % no initial or continued tearing. Oil, heat, water or thorns do not challenge the outer fabric reinforced with Gladiator® Extreme yarns. These pants are the perfect armour for dense woods, overgrown with thorns. This exceptional high-tech leg protection, featuring KlimaAIR® and StretchAIR® technologies, guarantees maximum wear comfort.

Material:

Gladiator® Extreme: 100 % polyamide
Stretch fabric: 92 % polyamide, 8 % elastane
Lining: 100 % Cocona PES
Chainsaw protection: Dyneema

Back

Type C

(dimensions in mm)

■ Protection area

Front

Back

How does it work?

Chainsaw protection pants are protective clothing for working with a motor chainsaw and is intended to protect against injuries in the leg area. At the most vulnerable places in the front leg area, a layer of loosely woven, very long, fine, tear-resistant threads is integrated between the outer and inner pants materials from the ankle to the hip.

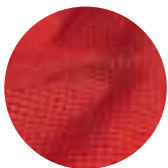

In case of contact, the chainsaw cuts the outer fabric and picks up the threads from the protective layer, which then wrap around the drive wheel of the chainsaw and block the machine in a split second.

In recent years, the European chainsaw protection standard EN 381 has been completely revised and adapted to the requirements of the times and current technologies. These revisions have been integrated into the new cut protection standard EN 11393. During the transition period, both standards remain valid and continue to offer the maximum safety with our products.

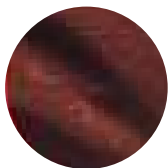

Chainsaw protection pants are defined by EN 381-5. There are two forms for the leg protection: The **Type A** is intended for professional chainsaw operators in conventional wood harvesting operations. The chainsaw protection is essentially limited to the front of the legs. The **Type C** is to be used by persons who are at risk of being injured by the chain saw on the back of the leg. **Type C** pants have the protection area on the front and back (enclosed protection).

The chainsaw protection pants are divided into 4 classes: Class 0: up to 16 m/s, Class 1: up to 20 m/s, Class 2: up to 24 m/s, Class 3: up to 28 m/s

In a central application test the KWF (Board of Forestry and Forestry technology) checks the application value of personal protective equipment. After a wearing time of one year the respective test persons assess the quality of the PPE with a specially developed questionnaire. The assessment includes the equipment, wearability, durability and wear resistance as well as the maintainability of the product.

Gladiator®

Gladiator® Extreme

FPA-approved

ONLY CLEAN PANTS ARE **SAFE PANTS.**

Washing instructions for chainsaw protection pants:

During use of the chainsaw protection pants sweat and oil regularly penetrates the layer of the chainsaw protection. This dirt agglutinates the fibres that ensure the chainsaw protection, and thus reduces the protective effect. In order to maintain the performance of the chainsaw protection, it is necessary to wash the pants properly on a regular basis. For daily use and average soiling, weekly cleaning cycles are recommended. If heavily soiled, wash immediately after wearing.

Preparation

In the case of extreme soiling apply the Detergency Booster, optimally mixed 1:1 with water, directly on the stains using a spray bottle and, if possible, allow to react overnight in water. Then remove the stains with a hand brush and wash the clothes as usual.

Machine wash

To ensure that the oil is removed from the washing machine, it is important to use liquid **colour detergent** and **not a heavy-duty detergent**.

Dose the colour detergent as usual. For 1 kg of dry laundry (a pair of chainsaw protection pants weighs 1.6 kg) add 10 ml of Detergency Booster in the detergent compartment for prewash.

Attention

Start prewash at 40 °C and switch off the spin cycle!

The chainsaw protection pants must not be put through spin cycles. The spin cycle of a washing machine acts on the chainsaw protection of the pants like a milling action and compresses the fibres. This would significantly impair the chainsaw protection.

After washing, pull the pants into form and hang to dry.

Under no circumstances put the chainsaw protection pants in the dryer.

Storage and Transport

The chainsaw protection pants should be stored in a well-ventilated and dry room. Extreme temperatures and contact with fluids or UV radiation (e.g. showcases) should be avoided.

You will find the Detergency Booster from PFANNER® and further care accessories for your protective clothing at P. 177.

VERSATILE AND
FUNCTIONAL.

FUNCTIONAL CLOTHING.

The right equipment is essential for demanding work or leisure activities. Our Functional Clothing keeps you warm, cool and dry. Merino AirSoft Shirt

- Warming at low temperatures and cooling in hot weather
- Natural moisture management
- Anti-odour
- Reduces skin irritations
- Perforated fabric for maximum ventilation
- Pressure-free flatlock seams

The Merino AirSoft Shirt is the perfect solution for every skin type. Due to the perforated fabric, this shirt has exceptional insulation properties. With the merino wool, it is absolutely odour-resistant and self-cleaning. The flatlock seams guarantee a pressure-free wear under any clothing. Natural moisture management ensures a pleasant feeling on the skin.

Material:
99 % merino wool, 1 % spandex

Merino-Tencel™ Shirt

- Cools when hot and warms when cold
- Scratch-free merino wool
- Odour-inhibiting
- Absolutely skin irritation-free thanks to the Tencel™ inner
- Extra-long back
- Optimum moisture management
- Elastane for 100% dimensional stability
- Suitable for washing machines and non-iron

Tencel™, paired with merino wool, scores highly with its extraordinary moisture management properties. This fibre combination absorbs more water without the fabric feeling wet and effectively wicks moisture away from the body in an odour-inhibiting manner. The 3 % elastane guarantees dimensional stability. Due to the body-hugging, sporty cut the Merino-Tencel™ Shirt offers unrestricted freedom of movement.

Material:
49 % Tencel™, 48 % merino, 3 % elastane

Sizes:

Carbon Salzburg S3

- Safety shoe EN 20345 S3
- KlimaAIR® technology
- No foam, no moisture accumulation
- 3 mm thick cowhide leather
- Carbon rubble edge, multiple riveted
- Stainless copper chrome eyelets
- Strong grip, soot-free Vibram rubber sole
- Sole replacement possible
- Puncture-proof Kevlar insole
- Nano-Active Insole
- Extra high aluminium cap

Carbon Salzburg S3 – combines traditional craftsmanship with our KlimaAIR® technology. The shoe has a completely double-stitched frame. For this, two upper leathers are sewn together with a 3-fold sole construction. This design provides maximum comfort and is odour inhibiting. In addition, this design also allows a sole replacement. The lightweight aluminium cap protects the forefoot from external influences.

Material:

Upper: cowhide leather
Lining: PES KlimaAIR®
Sole: all-terrain sole

Sizes:

39–46, LS: 47–49

BOA® Seguro Low S3

- BOA® Fit System
- Perfect one-hand handling
- Metal-free toe cap and sole
- TPU toe protection reinforcement
- Minimal sole wear
- Heel reinforcement
- Leather upper against hot chippings and welding spatter
- Self-cleaning profile
- 3CON® Reflex for enhanced visibility

The BOA® Seguro Low S3 is a lightweight and sturdy safety shoe. The patented BOA® twist closure allows quick and easy putting on and taking off, as well as a perfect fit of the shoe thanks to the precise adjustment of the laces. Reinforced heel for maximum form stability. Increased visibility is ensured by the processed 3CON® technology. Continuous leather upper provides protection against hot chippings and welding spatter. Wear-free eyelets and laces ensure the durability of the shoe. The breather fabric stands for comfortable wearing properties. The soot-free Vibram TPU sole guarantees highest grip and abrasion resistance.

Material:

Upper: leather
Lining: mesh fabric
Sole: Vibram TPU rubber sole

EXTREMELY LIGHT

Arborist STX Vertical

- Rubble protection
- VerticalLoop for climbing ascenders
- Lightweight shoe (645 g/boot in size 43)
- Absorbent Vibram Light sole
- Sympatex membrane
- 2.6 mm Perwanger leather

When it comes to vertical climbing, every unnecessary gram of gear is too much. With its light weight of 645 g/boot in size 43, the Arborist STX Vertical convinces. For countless uses and leisure activities, the lightweight Vibram sole ensures a secure stand and the Nano-Active Insole provides a cushioning feel when walking. The replaceable VerticalLoop eliminates the need for a tread sling and therefore the climbing clamp can be easily attached to the boot. The 2.6 mm water-repellent Perwanger leather and the Sympatex membrane withstand all weather conditions.

Material:

Upper: Perwanger leather
Lining: Sympatex
Sole: Vibram

BOA® Class 2 Chainsaw Protection Boot

- Perfect fit due to double BOA® Fit System
- The lightest class 2 chainsaw boot, less than 1 kg at EU shoe size 41
- Rubble protection, upper material and chainsaw protection continuously riveted together
- Metal-free toe cap and sole
- EN 20345 S3 and EN 17249 certified
- Waterproof Sympatex membrane
- Additional reinforced rubble edge
- Extremely high shaft, 27 cm at EU shoe size 43

The lightest of the class 2 chainsaw protection boot, under 1 kg at size 41. The double Boa® Fit System impresses with its precise, safe fit, and quick on and off and/or loosening for ventilation and pressure relief. The closures withstand concrete, rain, ice and freezing temperatures. The PFANNER® patented chainsaw protection and the extended, wave-shaped rubble protection, make the boot immediately recognisable as a chainsaw protection boot (optical image of a saw chain, yellow rivets for chainsaw protection class 2).

Material:
Upper: leather, Cordura
Lining: Sympatex
Sole: Vibram

Sizes:
39–46, LS: 47–48
Large sizes + 10 % surcharge

Rubble protection, upper material and chainsaw protection continuously riveted together so that the chainsaw protection does not slip when walking. All-terrain puncture-proof Vibram sole with Kevlar, protective composite toe cap, TPU toe protection. The boot is suitable for all tasks such as carpenter, welder, steel-worker, etc. – the laces cannot burn.

Patented Vario Support System (VSS)

EN 17249
class 2 24mm

Matterhorn Class 2 Chainsaw Protection Boot

- EN 17249 chainsaw protection class 2
- Ceramic stud reinforced surface
- Aluminium protective toe cap
- VSS (Vario Support System) exchangeable in the heel area
- Best grip Vibram alpine sole
- Narrow tread for effortless walking
- Multiple riveted double seams reinforced with rubber rubble edge
- Shock-absorbing midsole

Item 106835

Item 104235 VSS (Vario Support System)

The unique VSS in the heel area provides maximum stability. The narrow outer sole makes it possible to walk with minimum effort. The VSS splint system protects the ligaments and prevents sprains, especially when descending steep terrains. The VSS insert can be removed for flat surfaces and when driving machines and vehicles. Multiple rivets at the areas susceptible to scrub and abrasion prevent wear of the double seams. Ball eyelets facilitate the lacing of the boot and prevent wear. The Matterhorn Chainsaw Protection Boot is equipped with a GORE-TEX membrane. The Nano-Active Insole provides a cushioning feel when walking.

Material:

Upper: leather/micro-fibre, ceramic
Lining: polyamide Cordura
Sole: Vibram

Hooked eyelets to securely fix the tongue

Chainsaw protection classes marked by coloured rivets (yellow = chainsaw protection class 2)

sympatex®

Pilatus Class 2 Chainsaw Protection Boot

- Rubble protection, upper material and chainsaw protection all riveted together in a continuous wave from top to bottom
- EN 17249 chainsaw protection class 2
- EN 20345 S3 certified
- Aluminium protective toe cap
- Rubber rubble protection
- Round eyelets/rivet eyelets
- Shock-absorbing Vibram sole
- Sympatex membrane / Cordura lining
- New: Hard rubber heel reinforcement

The Pilatus Chainsaw Protection Boot stands out with its patented rivets, which stably connect the upper material, the chainsaw protection and the rubble protection. The PFANNER® patented chainsaw protection and the heightened wave-shaped rubble protection, make the boot immediately recognisable as a chainsaw protection boot (yellow rivets mean chainsaw protection class 2). Equipped with an aluminium protective cap, the shoe is a faithful companion both in the forest and on the construction site.

Material:
Upper: leather
Lining: Sympatex, Cordura
Sole: Vibram

Sizes:
37–46, LS: 47–48
Large sizes + 10 % surcharge

This all-rounder with waterproof Sympatex membrane and Cordura lining is ideally suited for a wide range of uses in any weather. The rivet eyelets do not damage the ropes, making these boots also suitable for climbing. The heel reinforcement provides 100 % protection from chafing.

- Ideal for shoes with a high shaft

Outdoor EcoDry Functional Socks: designed to keep your feet warm and dry in changing weather. These socks combine natural warmth with enhanced breathability and drying properties.

Material:

72 % merino EcoDry, 26 % polyamide, 2 % elastane

Sizes:

38–40, 41–43, 44–46, 47–49

Item 101230

100% MEMBRAN FREE

MERINO

Merino Thermal Socks

- High-quality merino wool, especially for cold temperatures
- Heels and toes reinforced additionally
- Shock-absorbing effect
- Thin instep

We have changed the manufacture of these socks to a 100-year-old knitting method. This increases the wear comfort through the airy structure and ensures an incomparable feel when walking. The merino wool does not absorb any odours and offers optimal insulating capability. The reinforced heel and toe areas make the wear points even more durable.

Material:

68 % merino wool, 27 % polyamide, 5 % Lycra

Sizes:

38–40, 41–43, 44–46, 47–49

KlimaAIR® carrying system
with AIRstream back padding

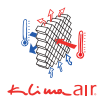

Zipp2Zipp®
triple compartment

Integrated rain cover

Softshell hood

NEW

AIRstream Zipp2Zipp® Backpack

- Patented Zipp2Zipp® triple compartment
- Extra large reflective stripes
- Waterproof cover for PROTOS®
- MaClip for the easiest opening and safest closing
- Holder for hiking poles
- Integrated, waterproof rain cover in neon yellow
- Colour-coordinated zip for the different compartments

Item 102007

Its maximum ventilation through the AIRstream system, cool design with the proven Zipp2Zipp® triple compartment, its body-hugging shape and practical zip volume expansion are all particularly eye-catching. Not forgetting the extra large cover with the MaClip closure for the PROTOS®. Extra wide, full-length reflective stripes for more safety in the dark and additional neon yellow rain cover.

Material:

Backpack: 100 % polyamide
Rain cover: 100 % PES

Sizes:

22 litres (+8 litre volume expansion)

Softshell Hood

Upgrade with the Hood. All items of the Inuit series may be ordered with hoods in the future. In addition, the practical Softshell Hood is available for the Zipp2Zipp® Colour Fleece Jacket, the Polar Jacket and Polar Jacket Women as well as for the Grizzly Jacket and Grizzly Sweater. The hood will be sewn on directly when ordering.

THE ORIGINAL.
SINCE 2012.

PROTOS®

PERFECTION IN EVERY DETAIL.

The safest head protection in the world. Since its market launch in 2012, PROTOS® has become the absolute benchmark. Created in Vorarlberg / Austria and traditionally manufactured in the region, PROTOS® incorporates the most innovative technologies in every detail to make everyday work in extreme hazardous areas significantly safer.

We are looking forward – based on a unique idea, we are constantly developing PROTOS® to meet tomorrow's challenges today.

For maximum protection.

For building industry and civil engineering, assembly and maintenance or other varied activities. Outstanding safety paired with unparalleled wearing comfort provide all-round head protection.

PROTOS® has an unobstructed field of vision and absorbs optimally not only vertical, but also horizontal impacts. Thanks to its 20-step size adjustment on the patented quick-release neck cradle, it can adapt dynamically to any head shape. The adjustable ventilation slider and KlimaAIR® main pad ensure a dry and cool head.

The forestry sector and its extreme requirements were and still are the starting point for the development of PROTOS®.

From the visor to the hearing protection, all components are integrally designed and prevent snagging on branches, bushes or thorns. Even when the visor or the hearing protection are in a park-position, PROTOS® stays perfectly on the head.

High-quality accessories make PROTOS® the first choice in forestry and tracking, regardless of whether it's cold and wet or hot and dry – with no ifs or buts.

PROTOS® Forest – for unconditional use.

BT-COM System

Reliable communication within the team thanks to the Bluetooth® technology.

Find our entire range of accessories starting on page 198.

Safety Glasses

Actioncam-Bracket with Safety Loop

Clip-on Clear Visor

Wall and Transport Mount

PROTOS® BT-COM

Safety means being able to communicate reliably with your team in any situation. PROTOS® BT-COM enables reliable communication for up to four users in the intercom network via Bluetooth® technology.

Thanks to two-way digital communication, radio interference is overcome. An additional advantage is the directional gooseneck microphone, which suppresses background noises by means of an additional integrated condenser and ensures clear communication.

A larger range can be achieved by combining the device with a mobile phone or handheld radio. The PROTOS® BT-COM is very easy to use with just three buttons.

Full-duplex communication ensures that the users can talk to each other at the same time and without delay, for at least 8 hours.

Of course, the BT-COM is fully integrated into the hearing protection capsule providing a dynamic park-position of the BT-COM capsule into the PROTOS®.

PROTOS® BT-COM – communicate clearly from dawn to dusk.

What makes PROTOS® BT-COM stand out:

- Up to four users in the intercom network
- Range several hundred metres
- Uninterrupted and clear communication
- Possible use as Bluetooth-headset for Bluetooth-enabled devices such as mobile phones, audio devices, GPS navigation devices, handheld radios, Bluetooth intercoms
- No cables or connectors
- Extremely easy to operate even with gloves
- Free smartphone app „PROTOS® Control“ with useful additional functions (e.g. coupling with handheld radios / emergency number etc.)
- Only 42 g extra weight including battery
- Microphone with background noise suppression
- Possible unrestricted park-position of the BT-COM capsule into the PROTOS®
- Supplied USB-charging bracket
- Choice of 10 colours

PROTOS® Video

PROTOS® Headset

- Space-saving
- Foldable
- No protruding parts
- Replaceable PROTOS® hearing protection capsule
- Headband with pressure-free support pads
- Can be combined with the Headset Glasses Clips and the PROTOS® Safety Glasses without compromising the sound insulation of the hearing protector
- Compatible with PROTOS® BT-COM

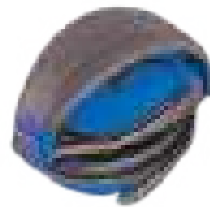

Item 204068

With the unique PROTOS® Headset, you are equipped for every application. The headband can be configured individually by simply combining it with the BT-COM and/or the safety glasses. The extremely light construction and the special placement of the support pads prevent pressure points to arise.

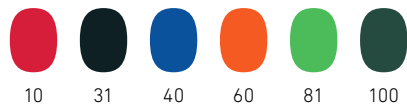

Regardless of the position, the headband stays in place and does not slip. The safety glasses can be mounted directly without the 28 dB insulation value being reduced by the brackets. Tested and approved according to EN 352-1.

Light, compact, practical.

PROTOS® UNIQUE HEAD SAFETY WITH YOUR PERSONAL DESIGN.

Safety or styling – why not both?

Make your dream of a unique PROTOS® come true and design it according to your personal ideas. Choose the colour combination you like and customise the PROTOS® with your logo, name or pattern according to your wishes. Thus, the head protection becomes a unique personal PROTOS® not only thanks to the accessories, but also through your creativity.

All options for an easy design at [protos.at](https://www.protos.at) or at one of the over 500 authorised PROTOS® partners.

Customisation

Whether in company colours, with a company logo or a picture – we design your PROTOS® individually. Either using adhesives on the shell or by visor and capsule printing.

- **Customised text and logo elements**
- **Free choice of base colour**
- **Customised adhesive on the outer shell**
- **4c UV printing on the hearing protection capsules**
- **4c UV printing on the etched metal visor**
(does not alter the visibility)

Printing on the capsules

To complete the unique piece is also possible a customised design of the hearing protection capsules.

WE ARE HERE
FOR YOU.

OUR SERVICE.

We own a dense network of distributors all over the world, which we are constantly expanding. We are also expanding our distribution channels constantly, to meet the rising demand.

If you want to **place an order** or have any questions about our products, please give us a call. Our service team is available by phone from Monday to Friday from 8 a.m. to 5 p.m. at **+43 59 50 50-200**.

You can also get advice from your specialist dealer.

You may **return or exchange*** our products within 14 days of purchase. For this, please fill out our return form completely, so that we can process your return quickly.

If you need a **repair service**, just send a short description of the fault and if possible a photo to your dealer* or directly to us:

info@pfanner-austria.at

PFANNER® customer support will find the ideal solution for you quickly and easily.

* Please observe the applicable requirements of your dealer and the corresponding laws in the respective country.

FINISHING

Strong appearance with image clothing. It is like your own textile business card. With materials that are colour-matched to the corporate design and your logo or lettering you can set company-specific highlights and promote the recognition value. Positive side effect: Image clothing also enlivens the team spirit of your employees.

We support you in the colour design and the placement of your logo and advertisement by printing or embroidery at the appropriate location.

Consultation, design and final artwork of the garments are free of charge. We look forward to your inquiry.

Simply contact us at info@pfanner-austria.at or by phone: **+43 59 50 50-200**.

You can also get advice from your specialist dealer.

Transfer Emblems

Transfer emblems are an excellent choice, especially if sharp contours and small subtleties must be implemented properly. T-shirts, sweatshirts and polo-shirts are ideal for the application of this technique. But your prints will also appear perfectly on stretch materials and functional clothing. If not all emblems are needed for an order, we will store them free of charge for you. This way we can quickly produce small quantities or single items in subsequent orders. Starting at 25 identical emblems, we will perform your printing request.

Screen printing

The classic printing process is extremely durable, resistant to washing and ideal for larger quantities, starting at 50 items. T-shirts, sweatshirts, polo-shirts and bags can be finished with colour gradients or multi-coloured motifs. Even photorealistic prints are possible. Nearly all textiles can be printed with an almost unlimited choice of colours. The colour is completely water-based and safe for the environment.

Stick

Your protective clothing will look particularly high-quality if your logo or lettering is embroidered into the fabric. An embroidery gives a nice appearance and stands out for its great durability. Our first-class machines, needles and yarns, as well as our experience over many years, are the basis for a high-quality result. A wide range of thread colours allows us to present your motif in HKS or Pantone shades. In addition, this method is also applicable for smaller quantities. We only charge a small surcharge for less than 12 items. We embroider almost all types of textiles directly on the fabric. Our embroidery options on interchangeable Velcro are also very practical.

Plot

Printing your name, large lettering or less detailed logos can ideally be implemented with this method, even in small quantities. We produce plot prints in different colours or even with light-reflecting effects.

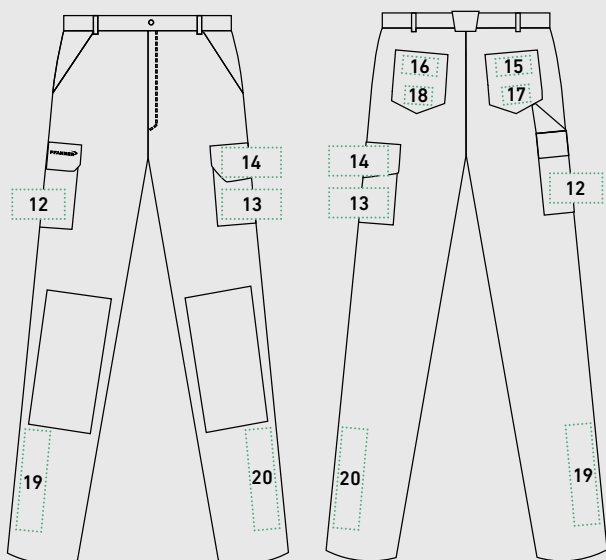

JACKETS

- Transfer, for 25 or more items, 1 to 6 colours
- Plot, for 1 or more item(s), 1 colour
- Direct embroidery
- Sewn embroidered emblem
- Embroidered emblem with Velcro
- Sewn woven emblem
- Patched on woven emblem

- 1 – right sleeve, 9×4.5 cm
- 2 – left sleeve, 9×4.5 cm

Determining the glove size

Measure your inner palm with a ruler or tape measure as shown in the illustration. In the example, the inner palm measures 9 cm wide. This gives you a glove size 9 or size L.

500 PARTNER: OTHER COUNTRIES, SAME SAFETY.
